

Amélie Yang

Engineering Student in Data & Information Systems – IMT Mines Albi

Grenoble, France • amelie.yang@mines-albi.fr • +33 7 67 95 35 99 • linkedin.com/in/amelieyang

Summary

Engineering graduate from IMT Mines Albi (Data & Information Systems), with hands-on experience taking AI-powered products from research to production (Python, Docker, CI/CD). Comfortable integrating LLM tools directly into the development workflow to move faster without compromising code quality. Fluent in English (TOEIC 965/990, C1). Available from September 2026.

Experience

AI Engineering Intern

Feb 2026 – Aug 2026 (6 months)

ALTEN Lab — Grenoble, France

- Owned the full lifecycle of an AI-powered document search product for industry, from research to production deployment.
- Benchmarked PDF extraction tools (Docling, PyMuPDF, OCR, VLM) and built two complementary RAG engines (frameworkless, LangChain/LangGraph).
- Shipped a robust, reproducible system integrating LLM tools (Anthropic, OpenAI, Mistral): quantified evaluation (RAGAS, recall@k), containerized FastAPI, CI/CD, deployed to production.

R&D Engineering Assistant Intern

Apr 2025 – Aug 2025 (4 months)

Yooz — Aimargues, France

- Built and compared multiple ML approaches (Random Forest, XGBoost, RAG, pure LLM) on real, unlabeled, noisy data.
- Designed a Dash web app to visualize and audit embeddings (PCA, t-SNE, UMAP), diagnosing failure modes of a production semantic search system.
- Shipped a RAG system indexed on a domain-specific knowledge base, reaching 81% match accuracy vs. 64% for a pure-LLM baseline – a comparative study that directly informed the product decision.

Production Operator Intern

Feb 2024 – Mar 2024 (2 months)

Laboratoires Pierre Fabre — Soual, France

- Strengthened operational skills managing a packaging line: monitoring, sorting, and feeding the process.

Education

The Catholic University of Korea

Sep 2025 – Dec 2025

AI Major – Exchange Student, Seoul, South Korea

Computer Vision, Data Mining, Machine Learning.

IMT Mines Albi

2023 – 2026

Engineering Degree, Data & Information Systems, Albi, France

Optimization, Databases, Numerical Computing, Big Data, Machine Learning.

Lycée Joffre

2021 – 2023

Intensive Preparatory Program, Mathematics & Physics (MPSI-MP), Montpellier, France

Strong focus on applied mathematics, physics, and algorithmics.

Projects

Real-Time Platform Waiting-Time Prediction for SNCF (French Railways)

2025

Cleaned, processed, and aggregated real-time flow data. Trained and evaluated regression and time-series models in Python.

Skills

Programming

Python (NumPy, Pandas, Scikit-learn, TensorFlow/PyTorch), C++, SQL, R, Matlab

Backend & DevOps

FastAPI, Docker, CI/CD, Git

AI Tooling

LLM-assisted development (Anthropic, OpenAI, Mistral), RAG, LangChain/LangGraph

Machine Learning

Regression, time series, classification, clustering, CNN, MLP

Languages

English (C1, TOEIC 965/990), Spanish, Japanese

Volunteering

Secretary General – Sports Office, IMT Mines Albi (2024 – 2025)

Organized schedules and events. Wrote reports and meeting minutes.

Les Cordées de la Réussite (mentoring program) (2023 – 2024)

Mentored and guided high-school students in their academic orientation.

Certifications

MOOC – Occupational Risk Prevention (INRS) (2023)

MOOC – Intellectual Property (INPI) (2024)

Interests

Volleyball (2 years, competitive)

Music (piano, guitar)

Video games
